2009 GOLD SPONSOR

Bath Iron Works
A GENERAL DYNAMICS COMPANY

2009 SILVER SPONSORS

Dear Friend:

It doesn't seem as if a whole year has passed since we wrote to you about Engineers Week, but that is what it's been. We hope that this year has been a great one for you and your business, in spite of changes in the economy. With your help, we held a wonderful Expo at University of Southern Maine's Gorham Campus. Well over a thousand people attended, and they were fascinated by 120 diverse exhibits provided by our sponsors. Our theme last year was Space Exploration. What will the theme be for 2010? We don't know yet, but we're pursuing some fun leads, from Arctic exploration to the Physics of Baseball. Our website and other mailings will ensure that you know what's going to be happening almost as soon as we do.

We do know that the 2010 events will be held February 26th (Banquet) and February 27th (EXPO) on the University of Maine campus in Orono.

The Expo and banquet, the souvenir T-shirts, and the advertising that precedes all of that, all of these activities require money. We keep admission cost nominal for the Expo, because we want everyone who is captivated by engineering, math, and science in Maine to attend without worrying about the cost. We keep the T-shirts free, because we enjoy seeing them on the kids at the Expo and beyond. If you have dipped into your personal or company funds to help sponsor us in the past, THANK YOU!! It is because of you that we continue to volunteer year after year to make this event happen. If this is the first year that you are considering a sponsorship or an exhibit booth, please know that this is a contribution that will help hundreds of Maine kids experience the joys of discovery, and that you will have great fun participating also.

As before, we offer several sponsorship levels so you can consider what best suits your own circumstance. Each level and its associated benefits are described in the attached pages. As you make your selection, please remember the tremendous enthusiasm this opportunity gives the kids in Maine each year to see what we do in action, to take a part in it, and to consider their own future in engineering.

Our members will be calling you in a few weeks to follow up on this mailing. Any contribution you can make this year would be seriously appreciated; it's what you give that makes this event possible. If you have any questions in advance of our sponsorship calling drive, please feel free to contact me.

Sincerely,

Chet Rock, Chairman
Maine Engineering Promotion Council
